Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

1. Claim 4 is objected to because of the following informalities:

On lines 2 and 3, the phrase "at least one or more" appears to be redundant since "at least one" means the same thing as "one or more". The phrase "at least one or more" should be delete and replace with --at least one-- or --one or more--.

On line 6 of claim 1, after "first", insert --time--.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-5 are rejected under 35 U.S.C. 102(e) as being anticipated by Bush, Jr. (US Patent No. 6,486,899).

With regard to a plurality of measurement items divided into service effectiveness for shippers, service effectiveness for consignees and operations efficiency for transport logistics providers, as shown in claims 1 and 5, Bush, Jr. teaches a system for displaying logistics information that displays data for several performance parameters in a logistics system (col. 2, lines 8-22; col. 7, lines 31-54; col. 8, lines 10-38). Customer

service and average transit time would be examples of service effectiveness for shippers and consignees and profit margins would be an example of operations efficiency for transport logistics providers.

With regard to reliability and responsiveness, as shown in claim 2, Bush, Jr. teaches measuring percentage of on-time deliveries and customer service levels, respectively (col. 7, lines 45-51). With regard to cost and asset aspects, as shown in claim 3, Bush, Jr. teaches measuring profit margins and capacity information, respectively (col. 8, lines 14-21). With regard to at least one of the items in claim 4, Bush, Jr. teaches percentage of on deliveries which corresponds to providing services at the time promised to the shippers (col. 7, lines 45-51).

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Lettich et al. (US Patent Application Publication 2002/0049622) teach a providing logistics services.

Soga et al. (US Patent Application Publication 2002/001606) teach freight information management.
